## SOFTWARE ENGINEER - BACKEND

Software Engineer with 4+ Years of Experience | Specializing in Backend Development Using Go and Java | Skilled in Building Scalable Systems with PostgreSQL, MySQL, MongoDB, Redis, and Kafka | Strong in Problem Solving, Critical Thinking, and System Design | Passionate About Learning New Technologies and Driving Innovation in the IT Industry

---

## KEY COMPETENCIES

Go	MongoDB
java	Redis
PostgreSQL	Kafka
MySQL	

---

## PROFESSIONAL EXPERIENCE

LinkAja

Aug 2022 - Present

### Squad Lead

- Designed and developed scalable APIs and microservices to support front-end applications and third-party integrations
- Guide the squad in designing, developing, testing, and deploying software solutions.
- Identified, analyzed, and resolved software bugs and performance issues, and also ensuring optimal functionality
- Conducted code inspection to ensure the product requirement has fulfilled and also adherence to coding standards and best practices
- Ensure tasks are properly assigned to all Engineer in squad and progress is tracked.
- Work closely with the Product Owner to understand requirements, prioritize backlog, and plan releases.
- Collaborate with other squads to manage dependencies and integration points.
- Participate in performance evaluations and provide constructive feedback.
- Communicate squad progress, risks, and issues to stakeholders and upper management.
- Align team deliverables with business goals.

LinkAja

Oct 2020 - Aug 2022

### Senior Partner Backend Developer

- Designed and developed scalable APIs and microservices to support front-end applications and third-party integrations
- Debug and resolve technical issues or bugs in a timely manner
- Participate in sprint planning, daily stand-ups, code reviews, and retrospectives
- Collaborate with Product Managers, Designers, QA, and other engineers to deliver high-quality products
- Follow best practices in software engineering, including version control (Git), testing, documentation, and code review
- Write unit tests, integration tests, and support automated testing efforts
- Contribute to maintaining and improving coding standards and development tools
- Refactor code and improve performance, scalability, and reliability

Uang Teman

Jul 2019 - Oct 2020

### Software Engineer

- Created and developed APIs that served data to other microservices, web, and mobile in Go
- Maintain and improve existing system based on business need
- Designed and implemented database that fit with business need in PostgreSQL and MongoDB
- Fixing bug and error in system

**GOODIE.ID**

**Sep 2018 - Jul 2019**

**Backend Engineer**

- Created and developed APIs that served data to mobile and internal web in Java Spring MVC
- Colaborated with whole team member to develop product based on business need
- Integrated APIs with swagger for documentation purpose
- Developed admin page that used by internal team in ZK

**Indivara**

**Mar - Sep 2018**

**Backend Developer Intern**

- Developed admin page in ZK that used for internal team
- Created and developed APIs that served data to mobile in Java Spring MVC
- Developed admin page in ZK that used for internal team
- Created and developed APIs that served data to mobile in Java Spring MVC

---

**FORMAL EDUCATION**

**Bachelor Degree of Computer Science**

**Indonesia University**

Undergraduate in Information System

**Associate Degree of Computer Engineering**

**Padjadjaran University**

Undergraduate in Computer Engineering
